

# EMAILS & SPAM

Many emails today are spam emails or "junk mails". You should delete these email messages without opening them and also not reply to these emails.

Some safety tips for you to remember when you send or receive emails:

- ⊙ Don't give your personal information in an e-mail message if asked by a stranger.
- ⊙ Don't open attachments from email and instant messages sent by unknown sources.
- ⊙ If you receive an email asking for donation or money, do not reply or send money.
- ⊙ Don't forward e-mail messages that ask you to forward it to your friends, also known as chain messages.
- ⊙ If you receive an email that bothers you or makes you feel that you are in danger, report immediately to the Malaysian Computer Emergency Response Team (MyCERT) at <http://www.mycert.org.my/cyber999/>.
