

# SAFE COMPUTING TIPS

Some tips for safe computing and safer Internet experience:

- ⊙ Do not reveal information about yourself to people or websites you do not know on the Internet.
- ⊙ Create hard-to-guess passwords and keep them private.
- ⊙ Don't open emails from unknown sources.
- ⊙ Use anti-virus, anti-spyware and firewall, and keep them updated regularly.
- ⊙ Update your operating system and web browser regularly.
- ⊙ Back up your important files regularly.
- ⊙ Don't leave your computer unattended and passwords protect it when not in use.
- ⊙ Never reveal your true identity in chat rooms.
- ⊙ Contact Malaysian Computer Emergency Response Team (MyCERT) at <http://www.mycert.org.my/cyber999/> if something goes wrong online.
